

Profile

I am a software developer with more than 5 years of experience in iOS and web app development. I have involved in several full lifecycle of app development: from planning, coding, testing, to publishing globally. I also have experience as a technical manager and startup founder. I am a confident leader and have excellent communication skills.

Experience

Full Stack Developer, Foresight (theforesight.co.uk); Nottingham, UK – 2017 - Present

I am the core developer team to make a modern version of their recruitment technology SaaS and take it to the next level. I am building it using PHP and Laravel on the backend, and Javascript and VueJS on the frontend. The app is used by large multinational company organizations as a critical part of their recruitment planning.

Senior iOS Developer, Qiscus (qiscus.com); Indonesia – 2015-2016

I helped the team built a chat SDK (github.com/qiscus/qiscus-sdk-ios) and implement it for our own chat service and several health startup clients (halodok.com, linkdokter.com, apotikantar.com). I built the app using Objective-C and Swift. The highlight features are: text chat, files and image attachment, video dan audio call.

As a senior developer, I trained and mentored several junior developer transitioning into iOS platform. This includes answering their questions and consulted about iOS development techniques. I ended up doubling the quantity of iOS developers at the company.

IT Manager, Poltracking (poltracking.com); Indonesia – 2014-2015

I was recruited by Poltracking, one of most prominent political consultant in Indonesia, to build backend and dashboard software to manage political polls during election day. I successfully lead a team of three to accomplish this objective. I personally built a web app using PHP and Laravel to take data input from sms sent by surveyor and process it to display as a chart display and XML feed.

Co-founder, Recomine (crunchbase.com/organization/recomine); Indonesia – 2013-2014

I co-founded a startup called Recomine with my friend from college. The startup received initial investment from Indigo Incubator (indigo.id). We closed it after a year because of lack of funding and traction.

I built the web app using Go at the back end and Javascript at the front end. I also managed the server infrastructure and database administration.

iOS Developer, Suitmedia (suitmedia.com); Indonesia – 2012-2013

I helped Suitmedia to build iOS apps for their clients, such as Unilever Indonesia (warisankuliner.com) for their restaurant discovery app and Bisnis Indonesia (bisnis.com) for their news reading app.
